SECON-DELTA

Position: Sr. Security Controls Assessor
Location: Ft. Meade, MD
Security Requirement: Active TS/SCI clearance with full scope polygraph
_____

SECON-DELTA is a Service-Disabled Veteran Owned Small Business (SDVOSB) consulting company that strives to become the provider of choice within the government and commercial sectors by leading the development, testing, integration, operations and data analytics of our customer-based mission systems. Our team have a distinguished and proven track record of designing, implementing and supporting IT infrastructures to include desktop, server, data center, network infrastructure and cyber defense capabilities.

We currently have a position for a **Sr. Security Controls Assessor** in **Ft. Meade, MD**

We are seeking a highly skilled and experienced Sr. Security Controls Assessor to join our dynamic team. As a Security Controls Assessor, you will play a crucial role in ensuring the security compliance of our information systems, products, and components. Your expertise and attention to detail will be vital in identifying non-compliance issues and providing effective mitigations. If you have a passion for cybersecurity and possess the necessary qualifications, we invite you to apply for this exciting opportunity.

Brief Outline of Responsibilities:
- Conducting verification and validation for security compliance of all information systems, products, and components.
- Analyzing design specifications, design documentation, configuration practices and procedures, and operational practices and procedures.
- Providing identification of non-compliance of security requirements and suggesting possible mitigations for requirements that are not in compliance.
- Conducting on-site evaluations to assess the security posture of information systems.
- Validating the security requirements of the information system and ensuring they are met.
- Performing vulnerability assessments of the system to identify potential weaknesses.
- Coordinating penetration testing activities to assess system resilience against attacks.
- Generating comprehensive verification and validation reports (certification reports) for information systems.
- Providing recommendations for process improvement to enhance security practices.

- Assisting the Government in drafting standards and guidelines for system usage.

Minimum Qualifications & Experience:
- Twelve years of related work experience in the field.
- A Bachelor's Degree in Computer Science or IT Engineering can be substituted for four years of experience.
- Experience in security or system engineering in five or more areas, including: telecommunications concepts, operating systems, databases/DBMS, middleware, applications, web-servers, SANS/Netaps, Active Directory, firewalls and controlled interfaces.
- IAT Level III or IAM Level III certification required.

If you are a dedicated professional with a strong background in security and system engineering, and if you are passionate about ensuring the integrity and compliance of information systems, we encourage you to submit your application to info@secon-delta.com.

We offer competitive compensation and benefits packages, as well as opportunities for professional growth and development. Thank you for considering this opportunity with our organization. We look forward to hearing from you!

We are an equal opportunity employer and value diversity at our company. We do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.
