_____

SECON-DELTA is a Service-Disabled Veteran Owned Small Business (SDVOSB) consulting company that strives to become the provider of choice within the government and commercial sectors by leading the development, testing, integration, operations and data analytics of our customer-based mission systems. Our team have a distinguished and proven track record of designing, implementing and supporting IT infrastructures to include desktop, server, data center, network infrastructure and cyber defense capabilities.

We currently have a position for a **Subject Matter Expert (SME)** in **Ft. Meade, MD**

We are seeking a highly skilled and experienced Subject Matter Expert (SME) to join our team. The SME will be responsible for providing technical expertise and specialized recommendations in the field of automated solutions for complex information processing problems. This role will involve performing analyses, preparing reports, and delivering presentations. The SME will participate in medium to large, complex information and system security projects, as well as major phases of very large projects.

Brief Outline of Responsibilities:
- Provide highly technical and specialized recommendations concerning automated solutions to complex information processing problems.
- Conduct analyses and studies related to information and system security.
- Prepare reports and deliver presentations on findings and recommendations.
- Participate in medium to large, complex information and system security projects, as well as major phases of very large projects.
- Assist the Government with the development of requirements throughout the entire project lifecycle.
- Assist project members with analysis, evaluation, and preparation of recommendations for system improvements, optimization, development, and maintenance efforts in various specialties.

Minimum Qualifications & Experience:

- Bachelor's Degree in a relevant field of study is required.
- Minimum of twelve (12) years of related work experience.
- A Master's Degree in Computer Science or IT Engineering or a related field may be substituted for six years of experience.
- In depth knowledge of Linux Operating System.
- DISA STIGs experience.
- Strong analytical and problem-solving skills.
- Excellent communication and presentation abilities.

If you meet the above requirements and are ready to contribute your expertise to complex IT projects, we invite you to apply for this challenging and rewarding position. Please submit your resume to info@secon-delta.com.

We offer competitive compensation and benefits packages, as well as opportunities for professional growth and development. Thank you for considering this opportunity with our organization. We look forward to hearing from you!

We are an equal opportunity employer and value diversity at our company. We do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.
