

Position: Information System Security Officer (ISSO), Level II

Location: Ft. Meade, MD

Security Requirement: Active TS/SCI clearance with full scope polygraph

Certification Requirement: IAM Level 1 (Security+ CE)

We are seeking an experienced ISSO to join our dynamic team. Candidates with the following past performance will be a strong fit for this role. Provide support for a program, organization, system or enclave's information assurance program. Provide support for proposing, coordinating, implementing, and enforcing information systems security policies, standards, and methodologies. Maintain operational security posture for an information system or program to ensure information systems security polices, standards, and procedures are established and followed. Assist with the management of security aspects of the information systems and perform day-to-day security operations of the system. Perform vulnerability/risk assessment analysis to support security authorization. Provide configuration management (CM) for information systems security software, hardware, and firmware. Prepare and review documentation to include System Security Plans (SSPs), Risk Assessment Reports, Certification and Accreditation (C&A) packages, and System Requirements Traceability Matrices (SRTMs). Support security authorization activities in compliance with National Institute of Standards and Technology Risk Management Framework (NIST RMF).

Brief Outline of Responsibilities:

- Provide support to senior ISSOs for implementing, and enforcing information systems security policies, standards, and methodologies.
- Assist with preparation and maintenance of documentation.
- Assist in the evaluation of security solutions to ensure they meet security requirements for processing classified information.
- Assist with Configuration Management (CM) for information system security software, hardware, and firmware.
- Evaluate security solutions to ensure they meet security requirements for processing classified information.
- Develop and maintain documentation for Security Authorization in accordance with ODNI and DoD policies.
- Provide support to the Information Systems Security Manager (ISSM) for maintaining the appropriate operational Cybersecurity posture for a system, program, or enclave.

- Plan and coordinate implementation of IT security programs and policies.
- Manage and control changes to the system assessing the security impact of those changes.
- Provide daily oversight and direction to contractor ISSOs.
- Interact with customers, IT staff, and high-level corporate officers to define and achieve required Cybersecurity objectives.

Minimum Qualifications & Experience:

- Eight (8) years of combined work-related experience in the fields of IT, Cybersecurity or security authorization required.
- Experience in at least two (2) of the following areas is required: knowledge of current security tools; hardware/software security implementation; communication protocols; or encryption tools and techniques.
- Familiarity with commercial security products, security authorization techniques, security incident management, and PKI and authorization services.
- Bachelor’s degree in Computer Science, Cybersecurity, or IT Engineering is required. In lieu of a Bachelor’s degree, four (4) additional years of experience may be substituted for a total of twelve (12) years.
- DoD 8570 compliance with IAM Level I is required. ComTIA Security+ CE certification, preferred.
